The number of broiler-type eggs in incubators on November 1 was 10 percent above a year earlier.

There were 27,714,000 egg-type chicks hatched in October, down 4 percent from October 1964. Reported decreases were 11 percent in the Western States, 7 percent in the East North Central and 5 percent in the South Atlantic States. No change from October last year was reported in the West North Central States. Increases reported were 3 percent in the North Atlantic States and 1 percent in the South Central States. There were 109,921,000 poults hatched during the first 10 months of 1965, an increase of 5 percent over the same 10 months period in 1964. The number of heavy breed eggs in incubators on November 1 was up 30 percent from a year earlier. The number of light breed eggs in incubators was up 15 percent.
